Course Description	The Meaning of Meaning is dedicated to asking this central question; what do we mean when we talk about meaning? That is, what mental, physical, and emotional behavior do we experience when we understand a message, convey a message, or just interpret the world around us? This course will not emphasize technical matters of semantics but rather, creative problem-solving of questions concerning aspects of meaning and interpretation. The interdisciplinary approach to the study of meaning will allow certain lines of investigation to be considered from several different perspectives, as well as incorporate references to classical texts into a framework that also includes more recent scholarship on cognitive linguistics and metaphor. This course will not assume any background in linguistics and will start from basic principles. This interdisciplinary course overlaps with studies in formal logic, truth conditions, pragmatics, semiotics, cognitive linguistics, discourse analysis, the philosophy of language and mind, the poetics of figurative language, and other forms of anomalous language use. As always, this syllabus reflects the expression of students on course surveys who want interactive, challenging but clear and fairly assessed instruction. Among other topics, we will consider the following, though probably not in the order presented below:  1. Language and Thought: Does language REALLY = thought? How and how not?  2. Thought and Reality: Does thinking it make it real?  3. Word Meanings: Hedgehogs, Unicorns and Goblins; & dogs and cats  4. Sentence Relations and Truth Conditions: What can be true or false?  5. Language Games: Is non-sense rule-governed?  7. Sentence Semantics: Situations, Participants, and Thematic Roles: Who did what to whom, by what means?  8. Pragmatics: Context, Inference and Reference: If you don't find proof in the pudding, look in the inferences!  9. Functions of Language: Speech Acts: When talking is doing!  10. Metaphor, Metonymy and the Creation of Conceptual Worlds: Is most of human mea
